Proceeds benefit STEM Education

Community Impact

This event supports and highlights a new generation of STEM education as well as provide the opportunity to meet with top Colorado tech industry leaders.

H5's STEM Innovation Center

The H5 Denver data center provides a classroom setting where students learn from experts across the data center ranging from electrical infrastructure, to network connectivity, cyber + on-site security, to sales + marketing, learning about the various career path available to them.

Programs are available in the following areas:

- Hardware installation and configuration
- Server virtualization
- Cloud computing
- Data center security
- Electrical and facility engineering
