H5 Data Centers' Fully Secure and Reliable Pittsburgh Facility

Our 30,000 SF Pittsburgh data center features redundant power, affordable electricity and access to a variety of communications networks, including Megaport.

The area is largely free from geo-risks such as earthquakes, floods, and tornados and is proximate to major population centers without the higher cost of electricity and total cost of ownership.

Highly Connected and Secure Access

Digital transformation continues to be a top IT priority for organizations of all sizes. The Pittsburgh data center makes hybrid IT easy by providing you with the ability to easily connect your data center infrastructure to the major public clouds like Amazon Web Services, Microsoft Azure and more.

Ideal For Connectivity Solutions

LET'S TALK: 303.714.7802

The Capacity & Features You Want

Infrastructure Features

- 30,000 sf data center
- N+1 UPS power
- Multiple diesel generators
